

scottyab/rootbeer Project Report:

This report summarizes the general status and activity of the rootbeer project repository as pulled through github commit data. This report is current as of 9/13/2023.

There are currently 19 authors who have made commits in this project on 31 source files present. This project has a commit history from June 2015 to November 2021.

The above scatter plot was generated to give a visualization of what files are being touched (committed to by) what authors, and how often.

It can be seen that some files are rarely touched, sometimes only having an initial commit, while others (file indexes 15 through 20) have been touched often by many different developers. Most of our development time and manpower seems to be focused on these aforementioned source files (indexes 15 through 20).

The most critical git commands to complete this report and repo were:

- `git checkout -b <branch_name>`
- `git clone <repo_clone_link>`
- `git commit -m <commit_message>`

The code used to generate the information this report covers can be found at:

<https://github.com/Ruaaann/CS-472-2023-GROUP-2>

in the 'mine_repository' branch.
